ACT® Prep Between Sessions

A guide for educational consultants

> *Structured, skill-focused ACT® preparation that tells every student exactly what to do next, and helps them understand why.*

How Magnolia Test Prep Works

Magnolia Test Prep is an online study program for the English, Math and Reading sections of the ACT®, plus the optional Science section. It is built around one idea: students learn best when they are taught the skill behind a question, practice it until it sticks, and know exactly what to work on next. Instead of handing students a pile of practice questions and wishing them luck, the program guides each student along a personal roadmap from their first quick check to test day.

Step	What happens	Why it matters
1. Free quick check	A free 15-minute quick check covering English, Math and Reading. No prior ACT score or account is needed.	Shows where the student stands today, a predicted score range, and the path to improve.
2. Personal roadmap	The program builds a plan: what to study, when, how, and for how long.	Removes guesswork. Students always know their next step and how much time to spend.
3. Learn the skill	Short lessons explain the concept behind each question type before practice begins.	Students learn the why, not just the answer, so the skill carries over to new questions.
4. Subject drills	Focused practice sets by subject: English, Math, Reading, and Science for students taking it.	Builds accuracy and confidence one area at a time.
5. Timed tests	Full and section-length tests under real ACT timing.	Lets students practice pacing and stamina before test day.
6. Weak-spot focus	Missed skills keep returning until mastered. A skill that stays stuck gets a short break, then a fresh lesson.	Study time goes where it's needed most, without letting one hard skill stall everything else.
7. AI tutor	A built-in tutor explains mistakes and answers questions in plain language, by text or voice.	Help is available the moment a student is stuck, not days later.

Magnolia TEST PREP

For Educational Consultants

You know each student's goals: a target score, a scholarship cutoff, a dream school. Magnolia Test Prep gives your students a structured daily routine between your sessions, so the time you spend together goes to strategy and coaching instead of re-teaching basics.

How it supports your work

- **A starting point for every student.** The free quick check gives you and the family a shared picture of where the student stands.
- **Structure between sessions.** The roadmap tells students what to do each day, so progress continues when you are not there.
- **Targeted practice.** Weak-spot review automatically concentrates practice on the areas holding a score back.
- **Real test conditions.** Timed tests show whether a student's pacing is ready for test day.
- **Fewer stalled students.** The AI tutor answers the 'I don't get this one' questions in the moment.

A suggested way to use it

When	Suggested use
First meeting	Have the student take the free quick check; review the results and the recommended path together.
Weekly	Students follow the roadmap's drills and lessons; you check progress and adjust goals.
Every 2-3 weeks	Assign a timed test to measure growth and pacing under real conditions.
Final weeks	Shift toward timed sections and weak-spot review to reinforce progress before test day.

Questions consultants often ask

Does it replace tutoring? No. It handles the daily practice and explanations, so your sessions can focus on strategy, motivation, and the student's bigger picture.

Can students use it on their own schedule? Yes. It runs in any web browser, and the roadmap adjusts the plan to the time remaining before the test.

What if a student gets stuck on a skill? After several days without progress, the plan sets that skill aside for about a week and keeps the student moving on other skills. It is flagged as "stuck," which is a good place to focus your sessions.

Key Features at a Glance

- **Teaching first.** Every question type is paired with an explanation of the underlying skill.
- **Guided roadmap.** A clear daily and weekly plan, so students are never left to decide on their own what to do.
- **Adaptive weak-spot review.** The program keeps returning to what a student gets wrong until it is mastered.
- **Realistic timed practice.** Tests run on ACT timing so students build pacing and test-day stamina.
- **AI tutor on demand.** Step-by-step explanations whenever a student is stuck.
- **Progress tracking.** Students can see how their accuracy and estimated score change over time.
- **Optional Science and STEM score.** Students taking Science get lessons, data-table practice, timed sections, and a STEM score (the average of Math and Science).
- **Keeps students moving.** If one skill stays stuck, the plan rotates to other skills and returns to it later, so progress continues.
- **Report a problem.** Students can flag any question they think is wrong, and it gets reviewed.
- **Works anywhere.** Runs in a web browser on a laptop, tablet, or phone; nothing to install.

Getting Started

- Visit **magnoliatestprep.com** and take the free 15-minute quick check. No prior ACT score is needed.
- Review the results: current standing, a predicted score range, and the recommended path. Predictions are estimates, not guarantees.
- Create an account and log in to begin the personal roadmap.
- Follow the plan, use drills and timed tests as scheduled, and ask the AI tutor whenever help is needed.
